

MASUM BILLAH

R-2, H-2, Sector 12, Uttara, Dhaka

☎ 01834760591 masumbillahsanjid@gmail.com  [Linkedin](#)  [Github](#)  [Stackoverflow](#)

SKILLS

Language: Dart, Python, C#, JavaScript, TypeScript, Kotlin, Swift

Frontend Framework: Flutter, ReactJs, NextJs

Backend Framework: Django, ASP.NET Core, Express.js

WORK EXPERIENCE

Panna Group Senior Software Engineer

Sep 2024 - Present

Battery Service | Dart, Flutter, ASP.NET Core, REST APIs, Oracle  

- Developed a dealer Service App with sales scanning, battery warranty verification, management **reports**, and technician access to battery and shelf-life information. Partially implemented the backend APIs and services.

Document Management System (DMS) | Dart, Flutter, Bloc, ML  

- The company stores all documents on a server with an **ML scanner**, including processing, tracking, version controlling, and many other features.

HRM | Dart, Flutter, Bloc, Clean, CI/CD, ML  

- Developed an HR management application for internal office use, contributing to both frontend and backend development as part of a team. The application includes attendance tracking with **face detection** and location tracking, leave management, notices, and other features to meet company requirements.

aamarPay Senior Software Engineer

Feb 2023 - Sep 2024

aamarPay app | Dart, Flutter, Python, Django, Provider, MVC, CI/CD  

- I built a feature-rich mobile application using Flutter and the MVC architecture. Provider helped manage the app's state, while functionalities like **e-commerce**, **food delivery**, and utility bill payments offered a convenient user experience. To securely handle payments, I integrated a **payment gateway** with the option to **save cards** for faster transactions. Additionally, I developed independent Django microservices for backend operations and implemented eKYC verification for enhanced user security.

aamarPay merchant app | Dart, Flutter, Provider, MVC  

- Developed a Merchant App to track merchant transactions, invoices, and settlements.

Flyhub Software Engineer

Dec 2021 - Feb 2023

- Developed an HR management application for internal office use, contributing to both the frontend and backend with the team.

Flyhub Agent UAE | Dart, Flutter, Typescript, Javascript, Express.js, ReactJs, Bloc, MVC, CI/CD  

- I built a sophisticated **air ticketing** application with a secure payment gateway for transactions. The application utilizes a backend system built with Express.js to manage user features and services. Additionally, I developed an administrative panel using React.js to manage the backend system.

ISHO Mobile application developer

Jan 2020 - Nov 2021

- Developed inventory management app to optimize factory storage and track office supplies.
- Work on some R&D projects, such as implementing a tenant service and an IoT service for furniture.

PROJECTS

bdfare | Dart, Flutter, Riverpod, Clean code architecture, MVP, CI/CD

- Contribute to the refund, void, profile, branch management, offer, and transactions features.

Neramoy Doctor | Dart, Flutter, MVVM, AWS, Azure, CI/CD

- Created a smart digital clinic for doctors and clinics to manage patient appointments via a mobile app.

Neeramoy Patient | Dart, Flutter, AWS, MVC, Azure ,CI/CD

- Made this application for digital telemedicine with **calling feature** using agora SDK

Dua & Ruqyah | Dart, Flutter, GetX, MVC

Quran Majeed | Dart, Flutter, GetX, MVVM

Al Hadith | Dart, Flutter, GetX, Clean architecture

LIBRARY & PACKAGES

Flutter state management solution | Dart, Flutter, CI CD

Official Flutter aamarpay library | Dart, Flutter, CI CD

Official Python aamarpay library | Python

Official Swift aamarpay payment librrary | Swift

keyboard_visibility_pro | Dart, Flutter

Open Source Contribution | Popover | Dart, Flutter

- I collaborated with a Ukrainian developer to add an animation transition to the library.

Education

Bachelor of Science in Computer Science and Engineering

Sep 2016 - Oct 2020

European University of Bangladesh

Certificate

Claude Code in Action (AI)

Anthropic
